Summary

Software Engineer specializing in React, Node.js, and Spring Boot, experienced in architecting scalable SaaS and real-time mobile platforms. Adept at optimizing backends, automating workflows, and delivering end-to-end solutions.

Education

B.I.T. Sindri

B. Tech. in Electrical Engineering | CGPA: 8.18

August 2023 – Present

Dhanbad, Jharkhand

Technical Skills

Languages: JavaScript, TypeScript, Java, Python

Frontend: React.js, Next.js, React Native, Redux, Tailwind CSS, Material-UI (MUI), Shadcn UI

Backend: Node.js, Express.js, Spring Boot, Prisma, WebSocket

Databases & Messaging: PostgreSQL, MongoDB, Redis, Firestore, Kafka, GCP Pub/Sub

Cloud & DevOps: Google Cloud Platform (GCP), AWS S3, Firebase, Docker, GitHub Actions, Nginx, Linux

Tools & APIs: Git, Cloudinary, OpenAI API, Gemini API

Experience

Full Stack Developer Intern, *Mentorque*

April 2026 – Present

- Implemented a streamlined frontend onboarding experience using React 18 and Vite to eliminate setup friction, successfully decreasing the average time-to-value for new users by 80%.
- Architected automated client workflows utilizing Node.js and Express.js to transition the product into a fully self-serve platform, successfully onboarding 100+ new clients in the first month and eliminating operations dependencies.
- Developed an automated resume parsing pipeline integrating OpenAI and Gemini APIs for precise keyword extraction, processing resumes in under 3 seconds with dynamic skill ranking and targeted formatting.
- Built a custom backend architecture for a Chrome extension to automate job application tracking and data annotation, successfully logging 4,000+ applications to streamline the candidate workflow.

Software Development Engineer Intern, *CricsHub*

January 2026 – April 2026

- Engineered a fantasy cricket module integrated into a live-scoring and tournament management application (1,000+ Play Store downloads) using React Native and Spring Boot, featuring real-time leaderboards that supported 300+ concurrent participants.
- Developed an end-to-end live streaming service utilizing WebSocket and SSE to synchronize in-app match data with real-time video overlays, alongside Razorpay integration for premium features and monetization workflows.
- Deployed the monolithic application on Google Cloud Platform backed by PostgreSQL and Redis, securing the platform with Firebase Auth, OAuth2, and JWT for robust access control.

Full Stack Developer Intern, *It's Your Story*

November 2025 – February 2026

- Launched the StoryQuest competition feature to enhance a core blogging platform using React and Firestore, facilitating time-bound writing contests with parameter-based winner evaluation, which drove a 62% increase in user submissions.
- Integrated product analytics to monitor user workflows, track competition engagement trends, and measure platform retention metrics, driving a 20% increase in new user acquisition and a 16% boost in returning users.
- Established end-to-end and integration testing across the entire platform workflow to ensure system reliability and maintain overall frontend stability during continuous deployment cycles.

Projects

AttendX | *React Native, Express.js, PostgreSQL, Prisma, Firebase, JWT* | [Link](#)

March 2025 – Present

- Engineered a geolocation-based attendance platform utilizing React Native and Node.js, replacing manual roll calls with a streamlined workflow that enables teachers to start and save attendance in under a minute with fewer than 5 clicks.
- Enforced precise spatial validation utilizing the Haversine formula to verify student check-ins within a strict 20-meter radius of the teacher's active session coordinates to prevent proxy attendance.
- Integrated passwordless OTP authentication via Nodemailer, secured API routes with JWTs, and configured Firebase Cloud Messaging (FCM) to push real-time session alerts to student devices for seamless mobile engagement.

Competitions

- 2nd Place, Nexus 3.0 Web Development Competition (500+ participants)
- 3rd Place, Spider 3.0 Web Development Competition (300+ participants)
- Top 2%, Hackatron 36-Hour Hackathon (1000+ participants)
